

## Archaeoastronomy in the 1990s

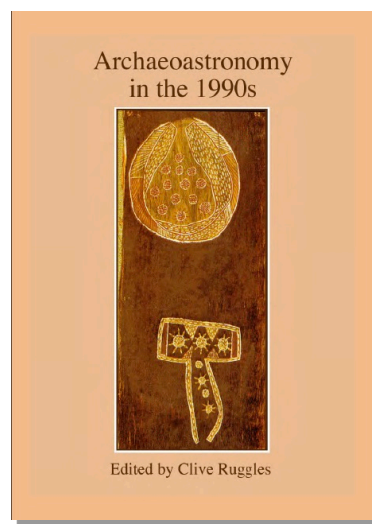

*Edited by Clive Ruggles*

First published 1993 by Group D Publications Ltd.

Re-published by Ocarina as e-book 2014 (ISBN 978-0-9540867-4-9)

xiv+364 pp.

One of two proceedings volumes arising from the “Oxford 3” International Symposium on Archaeoastronomy held in St Andrews, Scotland in 1990. The companion volume is *Astronomies and Cultures*.

### List of contents

#### *Introduction*

Archaeoastronomy—the way ahead	Clive Ruggles
--------------------------------	---------------

#### *Part I: Thematic contributions*

Archaeoastronomy in the Americas since Oxford 2	Anthony F. Aveni
Space, time and the calendar in the traditional cultures of America	Stephen C. McCluskey
Some social correlates of directional symbolism	Stanislaw Iwaniszewski

#### *Part II: New horizons*

Moon Man and Sea Woman: the cosmology of the Central Inuit	Susan M. Pearce
Time-reckoning in Iceland before literacy	Thorsteinn Vilhjálmsson
The geometry of pastoral stone octagons: the Basque <i>sarobe</i>	Roslyn M. Frank and Jon D. Patrick
The moon and Indo-European calendar structure	Emily Lyle
Some remarks on the moon cult of Teutonic tribes	Emília Pásztor
Astronomical knowledge in Bulgarian lands during the Neolithic and Early Bronze Age	Tsvetanka Radoslavova
Four approaches to the Borana calendar	Clive Ruggles
Astronomy in the ancient written sources of the Far East	Ildikó Ecsedy and Katalin Barlai
Orientations of religious and ceremonial structures in Polynesia	William Liller
Aboriginal sky-mapping? Possible astronomical interpretation of Australian Aboriginal ethnographic and archaeological material	Hugh Cairns

*Part III: New techniques, methods and approaches*

Basic research in astronomy and its applications to archaeoastronomy	Bradley E. Schaefer
A method for determining limits on the accuracy of naked-eye locations of astronomical events	Rolf M. Sinclair and Anna Sofaer
An integrated approach to the investigation of astronomical evidence in the prehistoric record: the North Mull project	Clive Ruggles and Roger Martlew
The astronomy and geometry of Irish passage grave cemeteries: a systematic approach	Jon D. Patrick

*Part IV: Continuing research: new results*

Sun and sun serpents: continuing observations in south-eastern Utah	Carol W. Ambruster and Ray A. Williamson
The origin and meaning of Navajo star ceilings	Von Del Chamberlain and Polly Schaafsma
Organisation of large settlements of the northern Anasazi	John McKim Malville and James Walton
Summer solstice: a Chumash basket case	Edwin C. Krupp
Counting and sky-watching at Boca de Potrerillos, Nuevo León, Mexico: clues to an ancient tradition	Wm. Breen Murray
Venus orientations in ancient Mesoamerican architecture	Ivan Sprajc
Mesoamerican geometry combined with astronomy and calendar: the way to realise orientation	Franz Tichy
Mesoamerican cross-circle designs revisited	Stanislaw Iwaniszewski
Were the Incas able to predict lunar eclipses?	Mariusz S. Ziolkowski and Arnold Lebeuf
Callanish: maximising the symbolic and dramatic potential of the landscape at the southern extreme moon	Margaret Curtis and Ronald Curtis
The Bush Barrow gold lozenge: a solar and lunar calendar for Stonehenge?	Archibald S. Thom
New evidence concerning possible astronomical orientations of 'Tombe di Giganti'	Edoardo Proverbio

*Part V: Education and dissemination*

An image database for learning archaeoastronomy	Clive Ruggles
